LIGHTER.
FASTER.
BOUNCIER.
Times they are a-changin'...

It seems to me that things are changing and changing fast in the running world.

Every brand partner seems to be rapidly developing their approach to running tech with an increased focus on softer, plusher cushioning with bigger, faster energy return and runner propulsion.

Revolution happens fast and as times get quicker, barriers smashed and records broken, now feels like a good time to try something new and be part of it.

Sounds good, eh? Hope you enjoy this edition and thanks as always for your business.
